In May 1941, the German battleship Bismarck embarked on a daring mission to break out into the Atlantic Ocean and attack Allied shipping. The British Royal Navy was determined to stop her, and a fierce battle ensued. *Battleship: The Loss of the Bismarck in May 1941* by Peter Padfield is a gripping and meticulously researched account of this famous naval battle.

Padfield draws on a wealth of primary sources to reconstruct the events leading up to and during the battle. He provides detailed descriptions of the ships involved, the tactics used by both sides, and the personal experiences of the men who fought in the battle. The result is a vivid and immersive account that brings the battle to life.

Battleship is more than just a story of a single battle. It is also a fascinating exploration of the broader context of naval warfare in World War II. Padfield examines the technological developments that led to the rise of the battleship, as well as the strategic and operational decisions that shaped the course of the war at sea.

Battleship is a must-read for anyone interested in naval history or World War II. It is a gripping and informative account of one of the most famous naval battles in history, and it provides a valuable insight into the broader context of naval warfare.

Praise for *Battleship*
